REPORT OF MY WEBSITE

CASE: 2

CASE NAME: COLLEGE INFORMATION WEBSITE

EXPLANATION OF MY WEBSITE

NRI University College Information Website – ExplanatioN

My project is an NRI University College Information Website. The main purpose is to provide college information in one place.

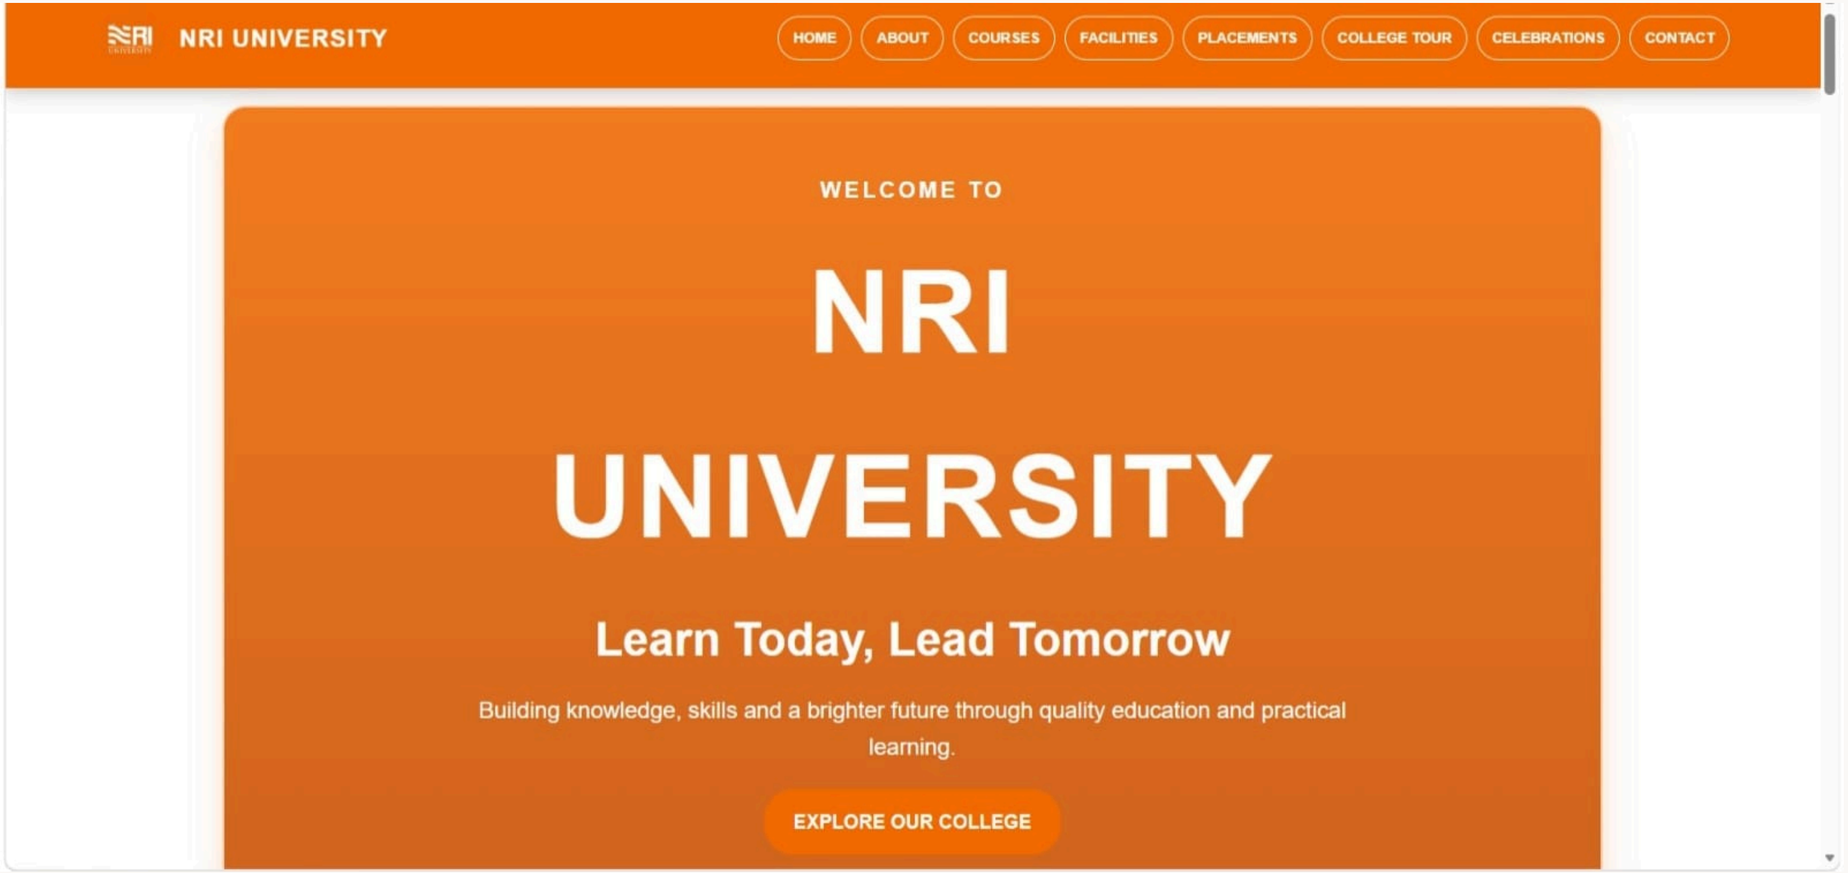

My website contains eight sections: Home, About, Courses, Facilities, Placements, College Tour, Celebrations, and Contact Us.

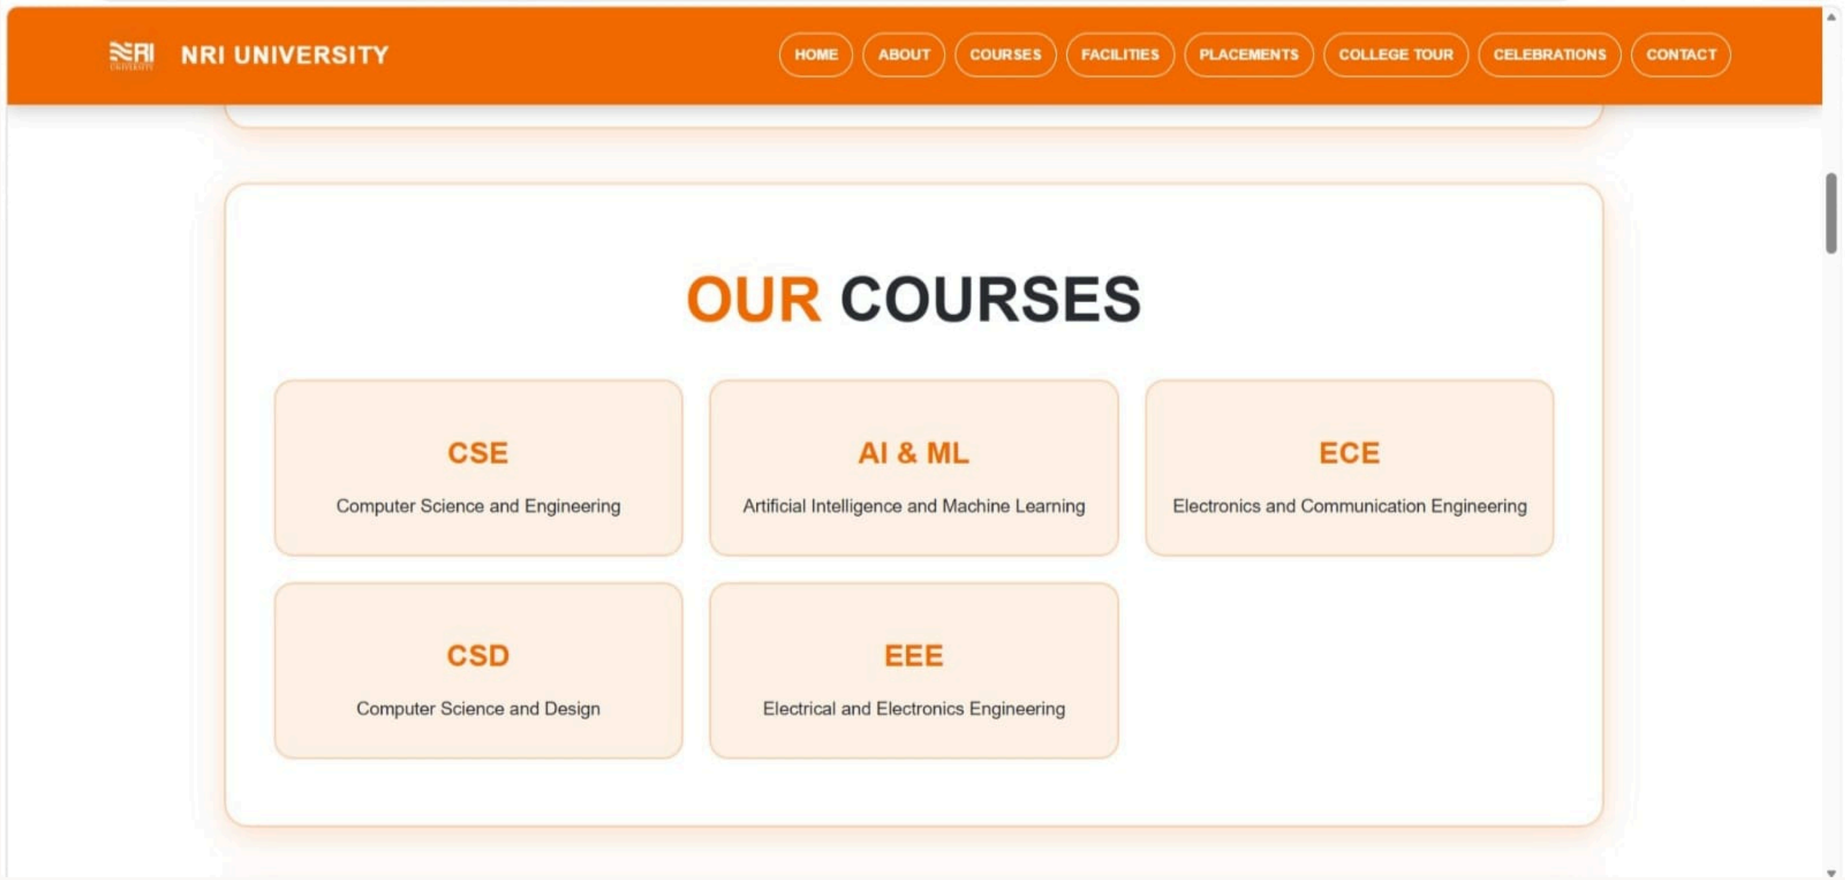

I used HTML to create the structure, CSS to design the website, and JavaScript to add interactive features.

This website helps students and parents learn about the college, courses, facilities, placements, and campus activities.

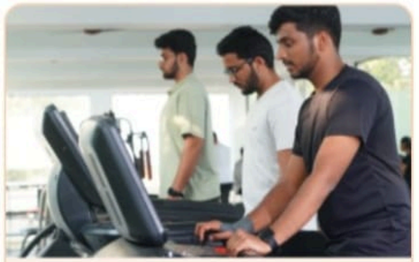

CONCLUSION

My College Information Website is designed to make information about NRI University easily accessible to students, parents, and visitors. It combines college details, academic programs, facilities, placements, and campus activities in one website. This project helped me understand how HTML, CSS, and JavaScript work together to develop a website

Student placement achievement at Revature.

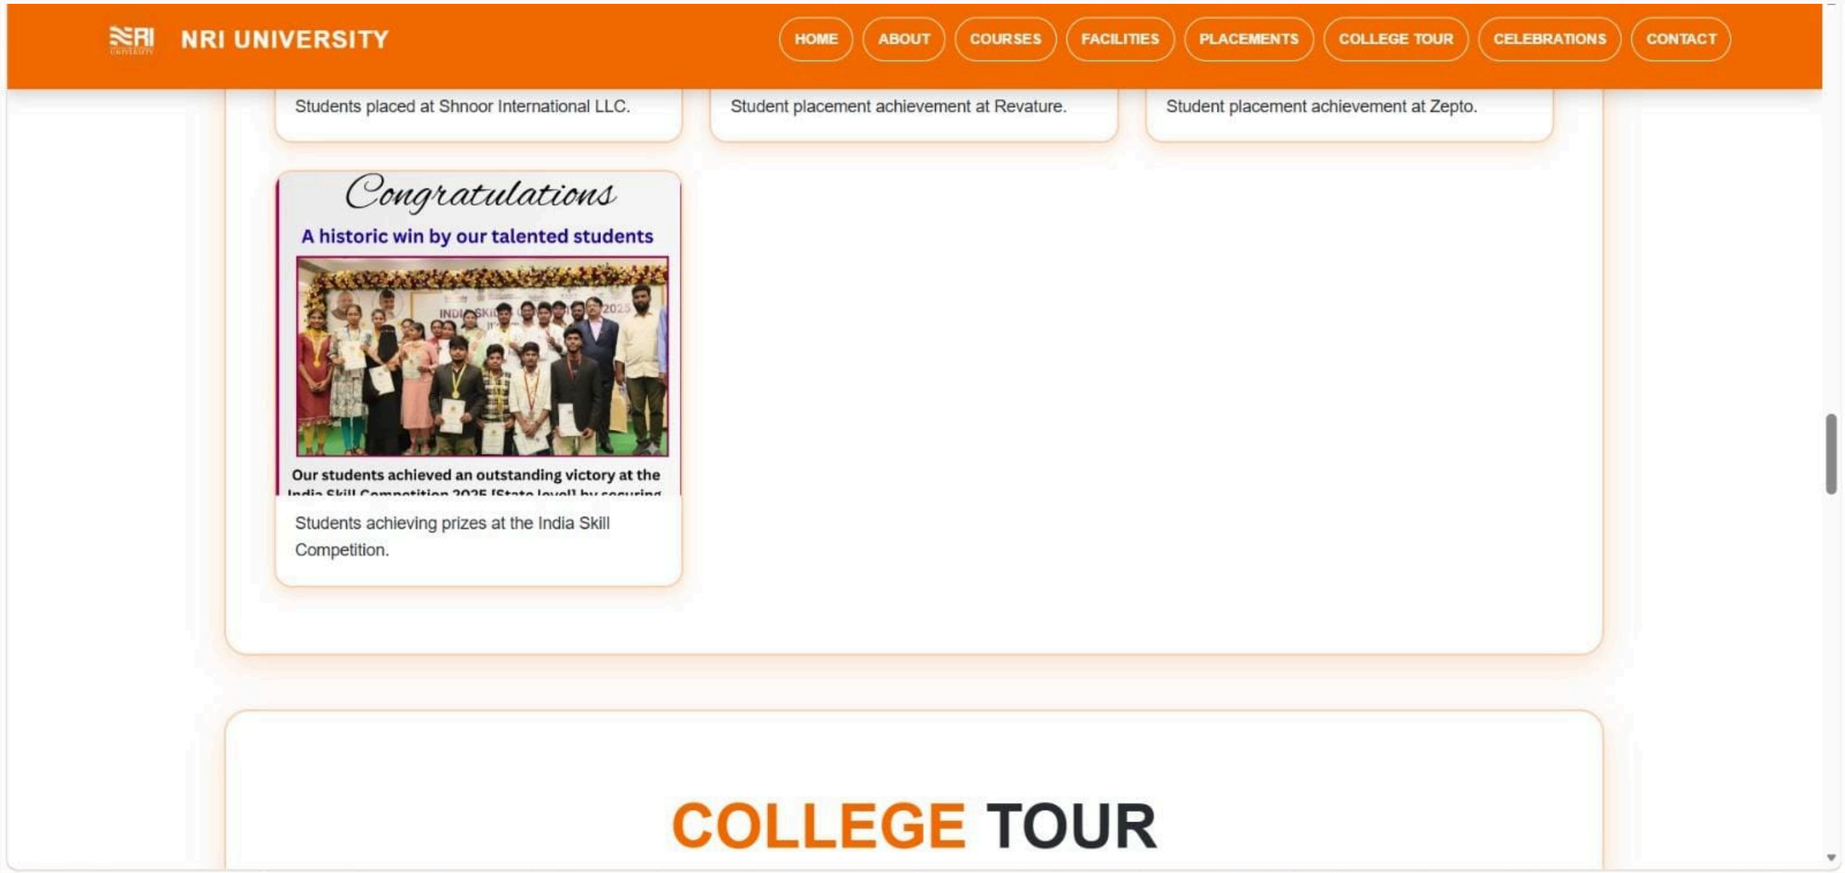

Student placement achievement at Zepto.

MY SECOND WEBSITE

REPORT OF MY WEBSITE

CASE: 12

CASE NAME: DOCTOR APPOINTMENT

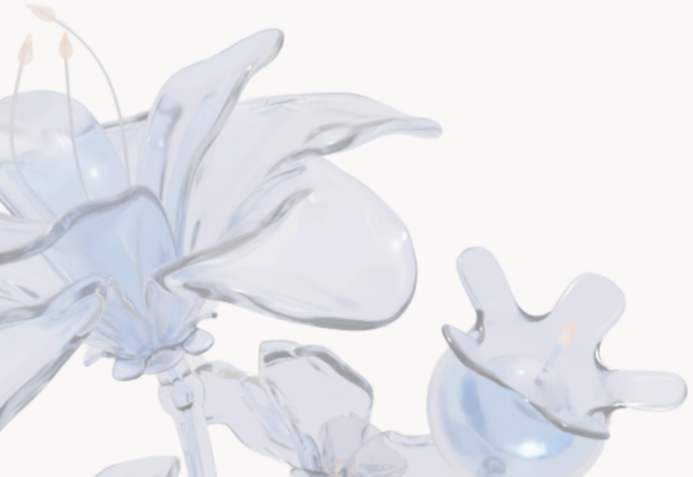

EXPLANATION OF MY WEBSITE

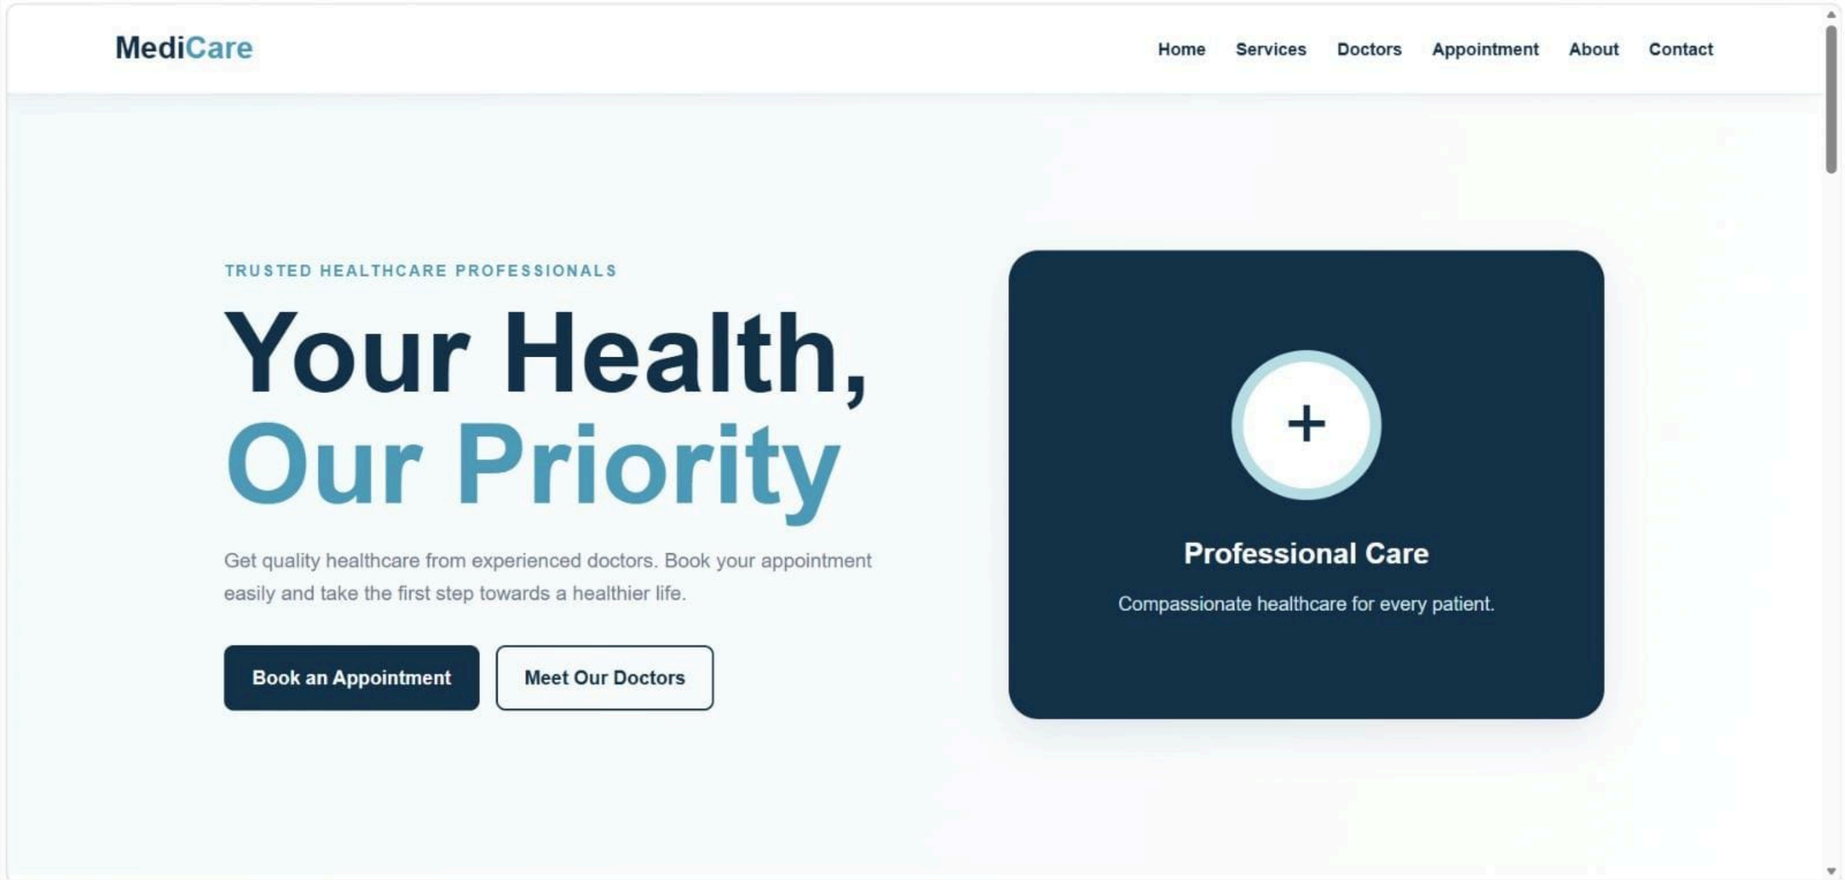

MediCare Clinic – Doctor Appointment Website Explanation

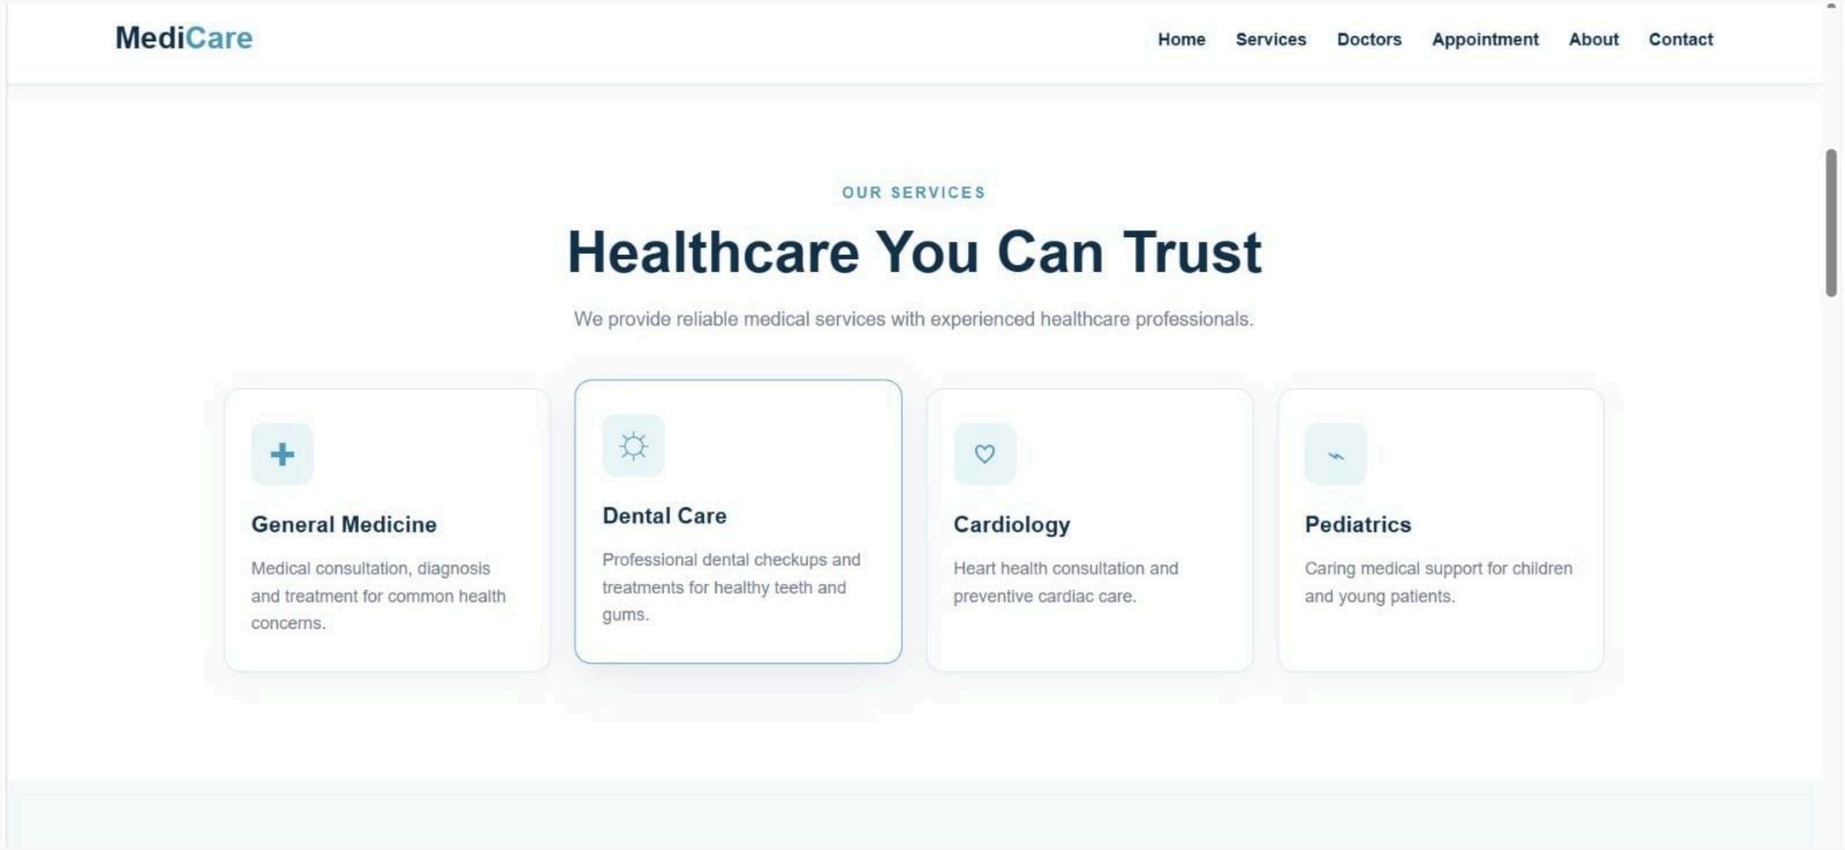

My project is a MediCare Clinic Website. The main purpose of this website is to help patients find doctors and book appointments easily.
My website contains six sections: Home, Services, Doctors, Appointment, About, and Contact.
The Services section displays different medical services. The Doctors section shows doctors' names and specializations. The Appointment section allows patients to enter their details, select a doctor, and choose a date and time.
I used HTML for structure, CSS for design,for interactive features.

CONCLUSION

In conclusion, the MediCare Clinic Website helps patients find doctors, explore medical services, and request appointments easily. This project helped me learn how to create a user-friendly website using HTML, CSS,

MY THIRD WEBSITE

REPORT OF MY WEBSITE

CASE: 20

CASE NAME: RESTUARANT AND CAFE

EXPLANATION

Velvet Brew – Restaurant & Cafe Website

Velvet Brew is a simple and attractive restaurant website developed using HTML, CSS, and JavaScript.

Home: Displays the restaurant introduction with an attractive image.

Navigation Bar: Helps users access different sections easily.

Menu: Shows food items with images, descriptions, prices, and Choose buttons.

Reservation: Allows customers to enter their name, email, date, time, and number of guests.

Design: Uses a cream and brown colour combination for a modern appearance.

Conclusion: This project provides a user-friendly platform for customers to explore food items and submit table reservation requests.
